RE: Issuance NPDES Permit Number 1200-Z  
File Number: 41940                      EPA Number: ORR110150  
Facility: Intel Corporation - Aloha Campus, 3585 SW 198Th Ave, Aloha  
Washington County  
Primary SIC Code(s): 3674  
Secondary SIC Code(s):  
Receiving Water AUID (Last 6 Numbers): 104134

Dear Antara,

Department of Environmental Quality (DEQ) has reissued the 1200-Z, effective July 1, 2021. Attached are your revised monitoring requirements under the reissued permit, starting July 1, 2021. All monitoring waivers expire on July 1, 2021. Please review the information closely.

It is your responsibility to comply with the new permit conditions and monitoring requirements starting July 1, 2021. DEQ will be transitioning to electronic Discharge Monitoring Reports during this permit cycle. As such, you will not receive the first page of the permit identifying your facility as registered under the renewed permit.

Please visit the DEQ industrial stormwater permits webpage to find a copy of the permit and associated documents. <https://www.oregon.gov/deq/wq/wqpermits/Pages/Stormwater-Industrial.aspx>.

If you identify any discrepancies in the tables or have other questions about permit requirements, please contact me at 503.681.5124 or [jettm@cleanwaterservices.org](mailto:jettm@cleanwaterservices.org).

Sincerely,

Marney Jett

## Monitoring Requirements

You must monitor for the pollutants in the tables below at all monitoring points.

If a discharge point is subject to a statewide benchmark(s) for the same parameter that also has a benchmark(s) in Schedule E, the statewide benchmark supersedes Schedule E concentrations. Please read Schedule E carefully.

If discharge to a Category 5: 303(d) listed receiving water for pH, total copper, total lead, total zinc and/or E. coli, the table(s) below will not also include statewide or sector-specific benchmarks for those pollutants. Exceedance of impairment monitoring may escalate to a water quality-based effluent limit during this permit cycle. Please read Schedule A.13 and Schedule C carefully.

Georegion	Pollutant	Statewide Benchmark	Unit	Frequency
Willamette Valley	Total Copper	0.015	mg/L	Four times per year
Willamette Valley	Total Lead	0.11	mg/L	Four times per year
Willamette Valley	Total Zinc	0.14	mg/L	Four times per year
Willamette Valley	pH	5.5-9.0	s.u.	Four times per year
Willamette Valley	TSS	100	mg/L	Four times per year

Receiving Water AUID (last 6 numbers): 104134	Pollutant	Impairment Concentration	Unit	Frequency
Beaverton Creek	Total Iron	10	mg/L	Four times per year
