

ENVIRONMENTAL, HEALTH & SAFETY AND ENERGY POLICY

Intel Ireland Limited is a semi-conductor wafer fabrication facility located in Leixlip, Co. Kildare. We are committed to achieving world class environmental, health & safety (EHS) and energy performance.

Our aim is to protect our people, community and the environment.

To fulfil this commitment, Intel will:

Comply, as a minimum, with all applicable regulatory requirements, including our Industrial Emissions Licence granted by the Environmental Protection Agency and our requirements as an 'Upper Tier' Control of Major Accidents and Hazards (COMAH) site regulated by the Health & Safety Authority.

In addition, comply with Intel's Corporate EHS and Energy requirements.

COMPLIANCE

Work to provide an incident and injury free environment.

Ensure that the controls we have in place to manage our operations are safe, effective, robust and in line with our corporate requirements such as corporate standards and goals.

Actively encourage our employees to manage their personal health & wellbeing.

SAFETY

Continually improve performance using our management systems such as ISO 14001 (environmental), ISO 50001 (energy) and ISO 45001 (occupational health and safety).

We will audit our systems and we will provide the information and resources needed to achieve our objectives and targets.

BEYOND COMPLIANCE

ENVIRONMENT & ENERGY

Promote pollution prevention technology to conserve natural resources and minimise emissions to air, land and water.

Proactively engage with Intel Corporation to support the philosophy of reduce, reuse and recycle.

Develop responsibility for excellent EHS and Energy performance across all levels of our organisation through awareness and training. We encourage everyone to act as advocates for Intel Ireland's commitment to EHS and Energy.

YOU ARE KEY TO OUR SUCCESS

Encourage on-site contractors, sub-contractors, designers and suppliers to:

- Apply EHS and Energy standards compatible with our own best practices
- Support the purchase of energy-efficient products and services

Work with key stakeholders such as regulatory agencies, the local community, our employees and contract workers to ensure that we identify and address emerging areas of EHS and Energy concern.

Allow this policy to be readily available to employees, contractors, customers and to members of the public.

This policy is supported by

Eamonn Sinnott
(Vice President, Technology & Manufacturing Group & General Manager, Intel Ireland Ltd.)

John Black
(Corporate Services Manager Intel Ireland Ltd.)
